EDUCATION

Bachelor of Technology – Computer Science & Engineering

JSS Academy of Technical Education Bangalore, VTU

2024 – 2028

CGPA: 8.7/10

EXPERIENCE

Research Intern · IIT Guwahati

May 2026 – Present

Worked on a digital twin framework for continuous water-quality monitoring and early contamination detection. The system used a segmented waterbody model, IoT-style sensor readings over a TCP client-server backbone, a centralized time-series Data Hub, regional Digital Twin state synchronization, and LSTM-based temporal analysis for normal/contaminated classification and threshold-based alerts.

Technical Team Member · Google Developer Groups · JSSATE

Sep 2025 – Present

Contributed to the technical team by organizing and executing Google-focused developer events, workshops, and hackathons for students. Worked on event infrastructure, technical coordination, and hands-on sessions covering modern development technologies, while supporting participants and collaborating with the team to deliver large-scale technical events.

PROJECTS

SWARM — Ephemeral Agents AI System

github.com/SWARM

SWARM virtualises a single LLM into 5–20 ephemeral agents with distinct cognitive roles that reason in parallel through a shared blackboard memory. Agents are dynamically spawned based on query complexity, competitively scored, and pruned after each task. Designed and developed the system as a self-organising multi-agent architecture.

Cyclops — Privacy-First Browsing Agent

github.com/Cyclops

Cyclops is a privacy-first browser agent using DOM-first, vision-assisted webpage understanding with local PII detection and redaction. Sanitized context is sent to remote LLM/VLMs for reasoning, while sensitive data and browser actions remain on-device. Built with local vision inference, structured tool execution, and a FastAPI agent backend.

SKILLS

- **Programming Languages:** Python (Advanced) · Java (Intermediate) · SQL
- **Frameworks & Libraries:** LangChain · LangGraph · FastAPI · REST API · SQLAlchemy
- **Software & Tools:** Git · GitHub · PostgreSQL · Docker · GCP · Linux · Cloud Run · Postman · VS Code
- **Soft Skills:** Communication · Teamwork · Adaptability · Problem-solving · Work ethic

AWARDS

- **Smart India Hackathon 2025** — Internal round winner, secured 1st place from 50+ teams in Agentic AI Healthcare domain
- **Smart India Hackathon 2026** — Internal round winner, consecutively secured 1st place from 65+ teams in Secure Browser Agents domain
- **Google Cloud Computing Foundations** — Earned certification in cloud fundamentals
